## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 5, 6, 7, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,536,630 to Chan et al.

Chan shows a structure for dispensing fluids as seen in Figs. 6 and 7, having a tubular mount 30 defining a chamber with an upper flange portion 38 and a threaded retaining cap 39 for mounting the device to a container, a lower portion 42, intake port 42, a volume variable, flexible bellows shaped and coiled biasing member 45 received inside the chamber formed by the tubular mount, see Fig. 9, the member 45 has a movable upper outlet 46, a tubular plunger 31 defining a delivery conduit and having a surrounding depression portion 35, a spout 34 fluidly connected to the depression portion and in fluid communication with the delivery conduit, see Fig. 3, an inlet valve 43, an outlet valve 41, a dip tube 41 including a valve seat for valve element 43, a porous member 58 denying entry of the valve member 43 into the flow passage while the fluid flows from the container into the passage, see Fig. 10, a stem 57 extending from the porous member and a spout 34.
